Mr. Hiram Edwards for:  
The Broadcasting Commission  
Ministry of Energy, Telecommunications and E-Commerce  
F.B. Perry Building  
2<sup>nd</sup> Floor,  
40 Church Street,  
Hamilton HM 12  
Bermuda

**Re: Minister's Directive – Local Content**

Dear Sir

We are in receipt of your correspondence, dated January 30, 2009, ref BC 73/025. Outlined below is the response of the Bermuda Broadcasting Company Limited.

The broadcasting of local content on our stations has greatly improved since Government first initiated discussion on this matter, as far back as 2001. Since the Minister's directive of 2005, Bermuda Broadcasting can report on specific, mandatory instruction to our announce staff, coupled with the growth of the Bermuda Music Movement on island, that have significantly enhanced Local Content on radio. Currently Bermuda Broadcasting has 2 programs of 2 hours duration each, per week, featuring local music exclusively. In addition all stations are required to play one selection of Bermuda music per hour.

**WHAT POLICIES DO YOU HAVE IN PLACE WITH REGARD TO AIRING LOCAL MATERIAL?**

Since the 2005 directive, Bermuda Broadcasting Co. has incorporated "programming lines" daily on the radio broadcast logs for Power 95, FM 89 and FM 105. These programming lines titled "Bermuda Song" appear as a written call-to-action for the announcer, who is required to write the title of the song and the name of the artist, along with the specific time it played on the radio.

This effort has been moderately successful for a variety of reasons, including radio format.

**DO YOU FEEL THERE IS ENOUGH QUALITY LOCAL MUSIC TO FULFILL THE 10% POLICY?**

It has been relatively easy to broadcast local content on our gospel station FM 105 and certainly on Power 95, because there is a lot of music being produced locally of the genre. However, the same is not true for FM 89 where Programme Director Everest DaCosta reports that he may receive 1 new CD per YEAR.

He currently plays local content from 92 singles in our broadcast library and reports "there is not enough quality, local music to fulfill the 10 percent policy requirement throughout each broadcast day." Further, Mr. DaCosta notes a lot of the music today clashes with the easy-listening FM 89 format.

He does not believe the current 10 percent policy as it applies to his format needs revision, but leaves the idea of reform open, should there be more local musicians producing more middle-of-the-road content.. **See attached playlist A.**

**HOW WOULD YOU PROPOSE THE SUSTAINABILITY OF THE LOCAL MUSIC INDUSTRY**  
Promoter and Radio Personality Jonathan Talbot is also the creator of the Underground Music Awards, UMA, now in it's 5<sup>th</sup> year. On Power 95, he hosts the Sunday evening radio show Tha' Underground that not only showcases local music, but via the internet takes local music international. Mr. Talbot reports Tha' Underground's mission is 2-fold - to play Bermuda music and to also educate artists on the industry as well as the presentation of their music for radio play. The awards show, allows the artist to showcase their work and to keep the music quality to standard, because at the end of the year, these Bermuda artists are looking for recognition for their achievements.

Mr. Talbot believes the quality of music produced on-island is much improved. New technology allows artists to create and produce their music without huge expense. Most artists want to see how far they can go with a recording, and Bermuda radio, is perceived as a testing ground/ indicator that helps to gauge potential sales and to create the buzz, that leads to work engagements.

Midday Power 95 Personality, Don Bassett has seen big success with his weekly local content radio program "Local Licks" which started as a 1 hour show every Wednesday and now runs 2 full hours. He regularly receives 2 to 3 new CD singles per week from local artists. Our broadcast library for Power 95 contains just shy of 130 CD's most of which are singles. **See attached playlist B.**  
Mr. Bassett has these observations.

On quality of production and presentation of the disk, musicians/producers are not always good. 8 out of every 10 discs submitted to the radio station, sport a felt-tipped marker for labeling. Lyrical content can be unsuitable for air with suggestive and/or profane lyrics. Our advice is to keep it clean otherwise it will not be played. He commended productions coming out of Steve Easton's Just Platinum studios, producers of Slinger's music as well as the CD's of Clinark Dill, another Bermudian who is achieving success in the UK. Other artists setting the standard include Fire Kid and Troy Anthony.

On the downside, a lot of the material we receive is still low on quality, tinny and distorted. Often lyrics are not suited for broadcast with inciteful or suggestive lyrics. One of Bermuda's most successful artists is Ras Mykkal, but sometimes the presentation of his disks is poor, with handwritten labels etc.

Our Christian Broadcast station FM 105 has a decent selection of local singles, **see attached playlist C,** but with a few exceptions, these recordings date back many years. Station Programming Coordinator Kelly Zuill puts particular emphasis on local content during his Gospel Train program Sunday afternoons.

**IN KEEPING WITH THE PROMOTION OF BERMUDA MUSIC, HOW WOULD YOU PROPOSE TO REFORM THE POLICY ... WHILE BALANCING PROGRAM MUSIC THAT APPEALS TO LISTENERS?**

We believe that as broadcasters we have taken several steps to bring attention and focus to Bermuda music on radio. More can be done, we'd like to think. We battle with the issue of finding the correct balance of established format with local music content as our goal on radio is to satisfy the paying sponsor and to entertain the listener.

As broadcasters we are prepared to do our part. But we are not the only stakeholders, in shaping the way forward. We ask, "what is the responsibility of production studios that can charge up to \$150 per hour to record an artist who has the will and determination to produce, but not the dollars, what role do the music stores play in showcasing the work of musical artists and finally there are the artists themselves. They too must step up their game using broadcast clean lyrics, providing disks that are professionally labeled, produced at industry standard and come with an entrepreneurial pitch and polish.

Going forward and should it be the wish of the government, to increase airtime allocation, it will need to jive with existing radio formats.
